

Building Mobile Applications using Ionic

Call 015 543 333 (English / Khmer) / 012 22 33 48 (English) to enrol!

\$150 per student

Course Dates / Times:

- Friday 2nd October (6pm - 8pm)
- Saturday 3rd October (9am - 4pm)
- Sunday 4th October (9am - 4pm)

Course Overview:

Ionic is an excellent Hybrid Mobile Application framework for building sleek, beautiful Hybrid Mobile applications targeting iOS and Android.

Modern frameworks such as AngularJS and Ionic make it easier to build Mobile Applications than ever! Ionic ships with useful and powerful pre-built templates and components. In this course, students will learn about the core Ionic components: pre built, easy-to-use features such as buttons, lists, tabs, and forms. Students will also learn how to combine components together into Angular JS Models, Views and Controllers and build amazing single page Hybrid Mobile Applications!

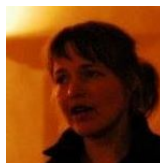

Prerequisites:

Students must already have some programming background, such as through school, basic training courses, or work experience - particularly with Internet Technology, HTML, CSS, JavaScript and Angular JS. **NOTE: The course will be conducted in English.**

Course Outline:

- Ionic Hello World
- Ionic Templates
- Ionic CSS components
- Layouts
- Tabs, cards, and lists
- Form
- Building a single view app
- Implementing Pull to Refresh
- Creating a multi-tab app
- Styling the applications
- Deploying applications

Course Teacher:

Salla is a software developer, architect and mentor. She has been coding for the past 10 years for various companies around the world, as well as running personal projects in all kinds of technologies. She has particular interest in mobile application development using Ionic!
